# Strengthen Officer Health. Empower Data-Driven Wellness.

Wellness Data Score (WDS) is a cutting-edge, AI-driven health scoring tool designed specifically for law enforcement wellness programs. It transforms raw medical, laboratory, pharmaceutical, and behavioral data into a single, meaningful wellness measurement — helping agencies protect the well-being and performance of their officers.

## Why It Matters

Law enforcement professionals navigate high-stress, high-demand environments. Over time, the effects can impact **physical fitness, mental health, and long-term readiness**. WDS empowers departments to:

- Identify at-risk officers earlier.
- Guide targeted wellness programs and mental health support.
- Track wellness trends throughout an officer's career.
- Reinforce department-wide safety culture and team performance.

When agencies use real data to inform wellness decisions, they enhance resilience, reduce burnout, and improve operational sustainability.

# Key Features

- **AI-Driven Wellness Scoring:** Proprietary WDS algorithm built on real-world health data.
- **Unified Health Analytics:** Combines medical, lab, prescription, and social metrics in one platform.
- **Actionable Insights:** Simplifies complex data for command staff and wellness coordinators.
- **Secure, Compliant Data Handling:** Meets HIPAA data protection standards.
- **Customizable Department Reports:** Track wellness trends, benchmark progress, and justify program funding.

## Designed for Agencies of Every Size

From local police departments to large federal agencies, WDS scales effortlessly. Implementation is fast and secure, allowing departments to integrate with existing wellness programs, healthcare providers, and internal HR systems.
